

Nova HD Umbrella Installation Information

Hinged Spigot (included)

- Hinged Spigot makes erecting the big long umbrella much easier
- The spigot is designed to attach to the top of the plate or inground fitting below
- The spigot can also be bolted directly to an existing concrete slab or deck but in this case the hinge cannot be used
- Plate diameter is 215mm
- Vertical pipe height is 700mm - the umbrella slips over the outside of this pipe and secures in place with a bolt

Base Plate

- Base plate for fixing to existing concrete slab or footing using concrete screws
- Can also be fixed to decks if reinforced with suitable "nog" between joists
- Fixing screws can be countersunk for a flush finish
- Galvanised steel
- Diameter of plate is 400mm

In-ground fitting

- In-ground fitting fixed into concrete footing at time of pouring concrete
- Galvanised steel
- Top plate is same diameter as spigot plate (215mm)
- Pipe that goes into the ground is 500mm long
